Imaging Department**04/05/1999****CERVICAL SPINE LIMITED TWO VIEWS****REASON FOR EXAM:** ANTERIOR CERVICAL FUSION WITH NECK PAIN**IMPRESSION:** Comparison to 3/10/99.

There is good alignment of the cervical spine. Suspect incomplete incorporation of the bone plug to the C4 and C5 vertebral bodies. The anterior portion of the bone plug may be separated from the remaining bone plug localized to the C4-5 disc level and the anterior portion of the bone plug measuring approximately 15 x 7 mm may have migrated slightly cranially. Recommend clinical correlation.
